

CAPABILITIES Statement

PROFILE

Founded in 1982

BATTA Environmental Associates, Inc. is a full service, integrated Professional Environmental Services Firm with In-House Accredited Environmental Laboratories. Core Competencies include Industrial Hygiene, Indoor Air Quality, Health and Safety, Environmental Due Diligence, Environmental Assessment and Remediation.

CERTIFIED

- Minority-Owned Business Enterprise (MBE)
 - National Minority Supplier Development Council (NMSDC) Certified
- Disadvantaged Business Enterprise (DBE)
- Small Disadvantaged Business (SDB)

FEDERAL

- DUNS 073562936
- NAICs 541620- Environmental Consulting Services
562910- Remediation Services
541380- Testing Laboratories
541330- Engineering Services
541350- Building Inspection Services
562112- Hazardous Waste Collection
- Cage Code 0WC36
- GSA Schedule # GS-10F-0004T

MARKET EXPERIENCE

- Federal Government** General Services Administration (GSA), Veterans Administration (VA), Dept. of Defense (DoD), US EPA
- Municipalities/States** Delaware, Maryland, and Pennsylvania. City of Philadelphia, Baltimore, Washington D.C.
- Education** School Districts in DE, PA, MD including Philadelphia and Baltimore. Regional Higher Ed campuses.
- Transportation** SEPTA, Purple Line, DeIDOT, MDOT/SHA, DRPA, DRBA, Philadelphia International Airport.
- Private** Fortune 500 companies, Prime Contractors, Subcontractors, Real Estate, Residential.

CORE SERVICES

Global Services

CONSULTING

LABORATORIES

PRODUCTS

TRAINING

INDUSTRIAL HYGIENE

- Indoor Air Quality
- Lead, Asbestos, Mold Services
- Air Monitoring
- Employee/Worker Exposure Assessment
- Recommendations for Risk Mitigation Expert
- Witness Testimony
- Silica Testing & Monitoring
- Noise Assessments & Management
- OSHA & HASP Training

HAZMAT & CONTROL

- Asbestos-Containing Building Materials (ACM) Surveys
- Remediation Design, management and Air Monitoring
- Lead-based Paint (LBP) Risk Assessment & Inspections
- XRF Survey, Paint Chip Sampling, Wipe Sampling
- HAZMAT Building Surveys for Renovation and Demolition
- HAZMAT Inventories and transportation/Disposal
- HAZMAT Management
- PCBs, RCRA Waste Characterization, TCLP Testing
- Indoor Air Quality Assessments
- Mold & Moisture Assessments
- Mold Remediation Measures and Management
- HVAC Assessments

COMPLIANCE SERVICES

- Technical Support for Agency Environmental Programs
- Environmental Management Systems (EMS) Audits
- AHERA Surveillance and Re-inspections
- Spill Prevention, Control and Counter Measures
- LEED Building Commissioning

IN-HOUSE LABORATORIES

- Asbestos Analysis (PCM, PLM, TEM)
- Lead Analysis (soil, dust wipe, paint chip, air) RCRA
- Heavy Metals Analysis
- Target Analyze List (TAL) Metals
- Target Compound List (TCL) VOCs, SVOCs
- Mold Tape / Swab / Bulk

GEO-ENVIRONMENTAL

- Site Investigations & Feasibility Studies
- Soil and Groundwater Sampling
- Underground & Above Ground Storage Tanks
- Soil Vapor Containment Assessments
- Remedial Investigations and Remedial Actions
- Human Health and Ecological Risk Assessments
- Hazardous Waste Characterizations under RCRA
- Remediation Designs and Implementation
- NPDES Storm Water Sampling

DUE DILIGENCE

- ASTM and AAI Phase I/II Environmental Site Assessments
- Environmental Impact Statements
- Storage Tank Assessments
- UST/AST Testing & Closure Management Brownfield
- Brownfield Redevelopment
- Landfill Remediation Management

TRAINING COURSES

- Lead Dust Wipe Sampling
- Lead Renovation, Repair and Painting (RRP)
- Asbestos Project Monitor
- Asbestos Building Inspector Asbestos Awareness
- Hazardous Communication / Right-to-Know

Plug & Play Industrial Air Purifiers

Onsite Oil/Water Filtration Systems

OVERVIEW

BATTA Environmental Associates was founded in 1982 and has since then consulted and provided Engineering and Analytical support to a diverse list of clients including Federal Agencies, State Agencies, Municipalities, and Fortune 500 companies. BATTA has been a recognized supplier of quality, value-added Environmental Engineering, Industrial Hygiene, Geo-Environmental, Indoor Air Quality, and Environmental Laboratory services. We maintain constant dedication to customer satisfaction, integrity, and safety, and hold ourselves to the highest standards and expect the best of our people when performing our work. Some of our larger clients include SEPTA, DuPont and The DOD. Additionally, BATTA utilizes partnerships with only the most qualified firms, in order to supplement our services and provide the highest quality of service possible, every time.

Our talented team at BATTA represents a group with depth and experience in many environmental areas. Our staff includes Professional Engineers, Professional Geologists, Certified Industrial Hygienists, Environmental Engineers, Environmental Scientists, Chemists, and Microscopy personnel. Working in a collaborative effort, our team is able to draw upon individuals' experience and expertise to handle the most challenging and technical environmental issues.

Our Industrial Hygiene (IH) experience includes a comprehensive list of consulting, investigative, testing, design, and construction management services for a diverse list of Hazardous Materials (HAZMATs) including asbestos and lead-based paint materials. These services continue to be provided for buildings undergoing renovations, alterations, repairs, and routine maintenance. BATTA's extensive experience with hazardous materials stems from consulting work with small private organizations all the way up to large fortune 500 companies and various government agencies.

Our Indoor Air Quality Group (IAQ) consults, tests, and prepares reports to a wide array of IAQ issues commonly found in buildings. Contracts range from a proactive basis to emergency response, on-call agreements. Our scientists and industrial hygienists work diligently to develop viable solutions to return air quality to healthy standards.

Our Geo-Environmental and Sub-surface experience is very diverse and established. We have produced numerous baseline studies, site assessments, drawings, and reports for clients to establish environmental conditions. Batta has conducted many in-depth environmental investigations, Site Characterizations and Remedial Investigations pertaining to hazardous substance sites. We develop sampling plans in conjunction with soil borings to further assess and document site conditions related to soil and groundwater. We develop specific remediation and removal scopes of work for contractors including all applicable health and safety directions to ensure successful and safe removal of any compromised systems. Safety Plans are developed to direct the transport/disposal of off-site soils and incoming fill. During removal we maintain constant presence to ensure compliance with specifications and for sampling of soil and/or groundwater. In addition, our team is on site to direct the activities of the contractor so the project can proceed quickly and safely. BATTA has the experience and expertise necessary to conduct these projects efficiently and effectively.
