1.0 INTRODUCTION

1.1 Purpose

The following Phase I Environmental Site Assessment (ESA) was performed at the request of Yanique Joyner of the Women's Community Revitalization Project (WCRP) in Philadelphia, Pennsylvania. The target property is located between 777 to 787 North 38th Street; 770 to 774 North Dekalb Street; and 3716 to 3726 Brown Street in Philadelphia, Pennsylvania. The target property is currently an undeveloped lot comprised of approximately 0.4-acres of land.

The Phase I ESA was performed to determine the likelihood that recognized environmental conditions (RECs), controlled RECs (CRECs), or environmental contamination exists at the target property due to current or previous activities on, or in the vicinity of, the target property.

By ASTM definition a REC means "the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property*: (1) due to any *release* to the *environment*; (2) under conditions indicative of a *release* to the *environment*; or (3) under condition that pose a *material* threat of a future *release* to the *environment*."

ASTM defines a CREC, as a REC "resulting from a past release of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A CREC shall be listed in the Finding Section of the Phase I ESA report and as a REC in the Conclusions Section of the report."

ASTM defines a historical REC (HREC) as a "past *release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past *release* a HREC, the *environmental professional* (EP) must determine whether the past *release* is a REC at the time the Phase I ESA is conducted (for example, if there has been a change in the regulatory criteria)."

If the EP considers the past *release* to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a REC.

1.2 Scope of Services

The scope of services and database searches were performed under the guidelines of the American Society for Testing Materials (ASTM) Standard Practice for Environmental Site Assessments: E1527-21 Phase I Environmental Site Assessment Process. Under the 2002 Small Business Liability and Brownfield Revitalization Act, Congress ordered the U.S. Environmental Protection Agency (USEPA) to codify the first federal environmental site assessment rule in history to address each of ten steps that must be satisfied prior to a property purchase to qualify a landowner for liability under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). Effective November 1, 2006, a property purchaser must comply with either the federal rule entitled "Standards and Practices for All Appropriate Inquiries" (40 CFR Part 312) or ASTM's revised Phase I Environmental Site Assessment Standard (ASTM E 1527-21) to

qualify as an innocent landowner, contiguous property owner or bona fide prospective purchaser under CERCLA.

To be specific, the Site Assessment conducted on this parcel included the following tasks:

1. An inquiry from an environmental professional.
2. Interviews with past and present property owners and occupants.
3. A review of environmental liens and/or activity use limitations for the target property.
4. A review of available historical information that could relate to potential environmental impairment. This information includes, but is not necessarily limited to:
 - Aerial photographs,
 - Chain-of-title documents,
 - Non-tidal wetland inventory maps,
 - Federal, state, and local environmental agencies records including permits and permit applications, spill information, compliance information, storage tank registrations, etc., and
 - EnviroSite Corporation (ENVIROSITE) radius map report with GeoCheck.
5. Review of federal, state, and local environmental agencies regarding the waste disposal records, UST records, and hazardous waste handling, treatment, disposal, and spill records concerning contamination at, or near, the facility.
6. A physical site inspection of the target property. This includes an inspection for unusual discolorations, odors, and physical irregularities, as well as underground or above ground storage tanks, electrical equipment that may contain polychlorinated biphenyls (PCBs), and an evaluation of current land use, and an inventory of petroleum and chemical storage and usage and wastes generated.
7. Specialized knowledge or experience on the part of the defendant.
8. The relationship of the purchase price to the value of the property if the property was not contaminated.
9. A review of commonly known or reasonably ascertainable information about the property, such as available soil and groundwater reports and other data from engineers, architects, environmental consultants, the property owners, or occupants.
10. The degree of obviousness of the presence or likely presence of contamination at the property and the ability to detect contamination by appropriate investigation.

2.0 *SITE DESCRIPTION*

2.1 *Location*

The target property is located between 777 to 787 North 38th Street; 770 to 774 North Dekalb Street; and 3716 to 3726 Brown Street in Philadelphia, Pennsylvania.

2.2 *Site Vicinity*

The target property encompasses fifteen (15) individual parcels/lots ranging in size from 0.02-0.08 acres with a total acreage of 0.4-acres in a residential section of Philadelphia. The target property is currently a vacant lot. A site location map is presented in **Figure 1**. A site vicinity map is presented in **Figure 2**.

The target property is approximately 0.42-acres; with the center coordinates of approximately -75°11'52.2" W Longitude and 39°58'3.9" N Latitude which equates to the state plane coordinates of 2683754.367 Easting and 241448.642 Northing in US Survey Feet.

2.3 Current Site Use

The target property is currently vacant. Site photographs are presented in **Appendix A**.

2.4 Past Site Use

The most recent past use of the target property was as residential housing.

2.5 Site History

Information sources that were readily available and used to research site history included an interview with Jacquelyn Bell, project associate, a review of readily available fire insurance maps, aerial photographs, topographic maps, city directory, title search, and correspondence with the local regulatory agencies.

2.5.1 Interviews

A site inspection of the target property was conducted by Rachel Owrutsky, a representative of Batta Environmental, Inc. (BATTa), on January 3, 2024. Jacquelyn Bell was interviewed and provided access around the target property. She provided information to the best of her knowledge. An environmental questionnaire is presented in **Appendix B**.

2.5.2 SanbornTM Fire Insurance Maps

Historical Sanborn[®] fire insurance maps were provided by ENVIROSITE. The target property was mapped for the years 1888, 1892, 1895, 1901, 1910, 1911, 1922, 1927, 1951, 1965, 1976, and 1980. A copy of the report is presented in **Appendix C**. The Sanborn Maps are summarized below in **Table 1**.

Table 1: Historical Sanborn Fire Insurance Map Summary

Year	Site	Adjacent Sites
1888	Two (2) buildings present on southern area of property	North: Unmapped South: Buildings present East: Undeveloped West: Unmapped
1892	No significant changes	North: Buildings present South: No significant changes East: Buildings present West: Buildings present
1895	No significant changes	North: No significant changes South: No significant changes East: No significant changes West: No significant changes

--	--	---

^[1] Around 2012, USGS stopped including details, such as footprints, within their topographic maps to produce them quicker.

2.5.5 City Directory

A city directory abstract search report provided by ENVIROSITE was utilized to evaluate the potential liabilities on the target property from the past activities. The search also provided database information on adjoining properties.

The abstract is available at the target property for the years 1937, 1956, 1961, 1967, 1973, 1978, 1983, 1988, and 1993. **Table 4** summarizes the city directory report. A copy of the city directory abstract is presented in **Appendix F**.

Table 4: City Directory Summary for Site

2.5.6 Title Search

An independent title records search of the target property was conducted as part of this Phase I ESA. The environmental lien search report provided by ENVIROSITE did not identify deed restrictions, activity and use limitations (AULs), or environmental liens on all target property parcels dating back to 1980. The environmental lien search and AUL report for the parcels are presented in **Appendix G**.

2.5.7 Previous Environmental Assessments

A Phase I Environmental Site Assessment (ESA), dated May 18, 2022 (revised May 17, 2023) was conducted by Batta Environmental Associates, Inc. (BATTa) for the site. The Phase I ESA was performed to determine the likelihood that recognized environmental conditions (RECs), controlled RECs (CRECS), or environmental contamination exists at the Site due to current or previous activities on, or in the vicinity of the Site. No CRECs, or HRECs associated with the Site were identified. The following RECs associated with the Site were identified:

- A historical dry cleaning facility was identified by environmental database reports as being upgradient from the Site. Due to the nature of the chemicals used at dry cleaners, there could be potential impacts to the Site.
- An unregistered leaking tank was identified by environmental database reports as being upgradient from the Site. There could be potential impacts to the target property.
- BATTa recommended a Phase II ESA to investigate potential impacts to soil and groundwater as well as a geophysical survey.

A Phase II ESA, dated March 6, 2023 (revised April 26, 2023), was performed by BATTa for the Site. A total of eight (8) soil borings were advanced across the site with two (2) soil samples collected from each soil boring location. Groundwater was not encountered in any of the soil borings. Therefore, no groundwater samples were collected during this investigation.

- Analytical results were screened against the Pennsylvania Residential Direct Contact (PA RDCS) screening values, Pennsylvania Used Aquifers Residential Generic Soil to Groundwater (PA RSGG), Pennsylvania Used Aquifers Residential 100x GW Soil to Groundwater screening values (PA RSGX), and Pennsylvania Residential Soil Statewide Vapor Intrusion (PA VI-S) screening values. Analytical results of the soil samples collected from each soil boring indicate most analyzed compounds were not detected. Select constituents that were detected were at concentrations above their respective PADEP RDCS and soil to groundwater screening value for SVOCs, vanadium and arsenic. However, the guidance dated February 26, 2022, issued by PADEP created a background threshold value for vanadium for sites with high concentrations level that are not related to a release of vanadium.
- To evaluate a potential vapor intrusion pathway, BATTa screened the soil results against the Statewide Health Standard for Vapor Intrusion Screening Values (PA-VI-S-R). All detections were below the screening values. The constituents detected in the soil do not represent a concern for vapor intrusion.
- GPR data detected three (3) anomalies which did not show GPR profiles characteristic of a UST (strong hyperbolic signatures along an apparent short axis and strong, flat reflections along an apparent long axis). However, strong metallic responses were present at each anomaly, and it is possible that any of these anomalies may be due to a UST or a UST carcass that has been crushed,

broken apart, deformed, corroded, or misshapen, and is indistinguishable from buried metallic debris.

A Notice of Intent to Remediate (NIR) was submitted to Pennsylvania Department of Environmental Protection (PADEP) on August 17, 2023. The NIR stated that WCRP is seeking a release of liability under the Act 2 Site-Specific Standard.

A combined Remedial Investigation Report/Clean-up Plan (RIR/CP), dated December 13, 2023, was submitted to PADEP. A Remedial Investigation (RI) was undertaken following the Phase II ESA investigation. Three (3) test pits were excavated in the areas of the three (3) anomalies detected during the geophysical survey. An underground storage tank (UST) was observed in one of the test pits. Soil samples were collected from each of the test pits. Analytical results were screened against the PA RDSC screening values, PA RSGG, PA RSGX, and PA VI-S screening values. Analytical results of the soil samples collected from each soil boring indicate most analyzed compounds were not detected. Select constituents that were detected were at concentrations above their respective PADEP RDSC and soil to groundwater screening value for SVOCs, vanadium and arsenic.

The planned remediation measures will generally be comprised of a “pathway-elimination” approach pursuant to the Act 2 Site-Specific Standard. To accomplish this, residual impacted soil will be isolated beneath engineered caps, such as building floors, asphalt parking lots/roads, or soil covers. This will ensure that no one can be exposed to the impacted soil in the future. Future site will be for residential purposes and groundwater use at the Site will be prohibited.

Previous environmental site assessments can be found at <https://battaenv.com/38thandbrown>.

3.0 PHYSICAL SETTING

3.1 Topography and Physiography

The target property is located on generally flat terrain at an elevation of approximately 83 feet above mean sea level (MSL). Adjacent sites are also generally flat.

Physiographically, the site is located within the Lowland and Intermediate Upland Section of the Atlantic Coastal Plain physiographic province. The Lowland and Intermediate Section consists of a flat upper terrace surface that is cut by numerous short streams. Most of these stream valleys are narrow and steep sided, but some have wider bottoms and less steep side slopes. The upper terrace surface is underlain by unconsolidated to poorly consolidated sand and gravel. These deposits rest on various metamorphic rocks. Local relief is very low in this section and elevations range from sea level to 200 feet.

3.2 Geology

As stated above, the site is located within the Lowland and Intermediate Upland Section of the Atlantic Coastal Plain physiographic province. The bedrock underlying this region consists primarily of the Pensauken and Bridgeton Formations of tertiary age. The Pensauken and Bridgeton Formations are comprised primarily of feldspathic quartz sand, gravel, and silty clay.

3.3 Hydrology

Surface topography is generally indicative of groundwater flow direction. The general topographic gradient for the site is relatively flat with a gradient to the east. The nearest surface water body is 0.41 miles to the east, which is the Schuylkill River.

3.4 Soils

According to the United States Department of Agriculture (USDA) Natural Resource Conservation Service (NRCS) Web Soil Survey (<http://websoilsurvey.nrcs.usda.gov/app/>), the target property is mapped as consisting of Urban Land (UB). The Urban Land designation for soils indicates that urban structures and works cover so much of the land that identification of the native soils is not practical. This soil type is found in highly developed urban areas where the original material has been disturbed or filled over. Areas of both cut and fill are moderately or rapidly permeable and extremely low in organic matter content and fertility.

According to the ENVIROSITE database report, the target property is located within Urban Land soil series.

4.0 SITE RECONNAISSANCE

4.1 General

On January 3, 2024, Rachel Owirutsky, a representative of BATTAs, conducted a visual site inspection of the target property and surrounding areas. Photographs from the site visit is presented in **Appendix A** of this report.

4.2 Exterior Areas

The property is a vacant, grassy, unpaved lot with a fence along the perimeter.

4.3 Building Interior

No buildings are present on the property.

4.4 Utilities

The property has access to the following utilities:

<u>Water:</u>	N/A
<u>Sewer:</u>	N/A
<u>Electricity:</u>	N/A
<u>Gas:</u>	N/A

4.5 Adjacent Properties

As part of the site visit, BATTAs conducted a vicinity survey in search of information suggesting the presence of locations within a ¼-mile radius of the target property which may represent a potential environmental concern. This vicinity survey was conducted by driving on public roads within the prescribed radius, making note of nearby facilities. The target property is in a pre-dominantly residential section of Philadelphia, and properties adjacent to the target property are described below:

North: Undeveloped
South: Residential
East: Community garden
West: Church of Faith

4.6 Underground Storage Tanks (USTs)

Based on the Phase II ESA conducted by BATTA, three (3) anomalies were identified during a GPR investigation. Three (3) test pits were excavated at the three (3) anomalies. One (1) UST was observed in one (1) test pit. BATTA submitted a RIR/CP, dated December 13, 2023, to PADEP.

4.7 Aboveground Storage Tanks (ASTs)

During the site inspection, no evidence of ASTs was observed. No further assessment is warranted.

4.8 Polychlorinated Biphenyls (PCBs)

Under the Federal Toxic Substance Control Act (TSCA), unmarked electrical equipment, unless indicated otherwise, can be assumed to be PCB-contaminated. TSCA defines “PCB-contaminated electrical equipment” as containing a dielectric fluid and/or cooling oil with between 50 and 500 parts per million (ppm) PCBs. Transformers containing over 500 ppm PCBs are called “PCB transformers”. There are no restrictions on the use of PCB containing electrical equipment mandated by TSCA.

However, “PCB Transformers” are subject to specific requirements that include use restrictions, servicing restrictions, quarterly inspections, marking requirements, record keeping and specific disposal procedures.

Potential “PCB transformers” may represent environmental concerns from possible spills or leaks of dielectric and/or cooling oils from the transformers. A threat to public health and safety also exists if a PCB-containing transformer catches fire.

No transformers or unmarked electrical equipment was present. No corrective actions are warranted.

4.9 Air Emissions

Air emissions are not an issue of concern for the target property.

4.10 Hazardous Materials Storage, Use, and Disposal

During the site inspection, BATTA did not observe any hazardous materials storage. No further evaluation is warranted.

4.11 Solid Waste Generation and Disposal

No solid waste generation or disposal was observed during the site reconnaissance. No further assessment is warranted.

4.12 Wastewater Generation and Disposal

No wastewater generation or disposal was observed during the site reconnaissance. No further assessment is warranted.

4.13 Vapor Encroachment Condition (VEC)

Vapor encroachment condition (VEC) screening identifies releases in the vicinity of the target property and based on the contaminant plume, evaluates the likelihood of vapors migrating to the subsurface of the target property. ENVIROSITE's VEC Application is an intuitive data analysis interface that allows environmental professionals to screen their target properties quickly and easily for vapor encroachment risk.

Accessed through ENVIROSITE Atlas, VEC Application provides the tools and content needed to make VEC determinations and comply with ASTM E2600 Standard Guide for Vapor Encroachment Screening and E1527. ENVIROSITE's VEC Application identified one (1) facility with the potential for VEC. These facilities are discussed further in **Section 5.3**.

ENVIROSITE's Vapor Encroachment Screening results are presented in **Appendix H**.

4.14 Pennsylvania Department of Environmental Protection (PADEP) Act II Program

Pennsylvania's Land Recycling Program Voluntary Cleanup Program (VCP) was established by a series of three legislations enacted in 1995. Acts 2, 3, and 4 of 1995 serves as the basis for what is more familiarly known as the Land Recycling Program or simply 'Act II'. The Land Recycling Program encourages the voluntary cleanup and reuse of contaminated commercial and industrial sites. The goals of the Land Recycling Program are to encourage private sector cleanup of contaminated, vacant, or otherwise underutilized properties and return them to productive use.

Further development of brownfield properties stimulates economic growth, encourages local government partnerships with businesses, and maximizes the use of existing infrastructure, thereby preserving prime farmland, open spaces, and natural areas. Act 2 provides grants and low-interest loans for assessment or remediation. These programs are available to people who did not cause or contribute to contamination at the target property.

4.15 Conditions Outside the Scope of ASTM E-1527-21

The limited asbestos-containing materials (ACM), lead-based paint, radon gas, Freshwater wetlands, and mold surveys are intended to provide an indication of the potential for business environmental risks associated with these materials. Hidden materials such as those inside walls, inaccessible attics, crawl spaces, and inside ductwork were not evaluated; drinking water and radon gas were not tested, nor were wetlands surveyed. As such, the following sections should not be regarded as comprehensive surveys for demolition, renovation, or site planning purposes.

4.15.1 Asbestos

An asbestos survey was not included in the scope of services. The USEPA regulations recognize any substance containing greater than 1 percent asbestos by weight as ACM.

The use of spray-on asbestos-containing insulation material was phased out in 1972, and the use of other ACMs was phased out in 1978.

No buildings are present on the target property. An ACM survey is not recommended.

4.15.2 *Lead-Based Paint (LBP)*

A lead-based paint (LBP) survey was not included in the scope of services. The U.S. Department of Housing and Urban Development recommends that action to reduce exposure should be taken when the lead in paint is greater than 0.5%.

In 1978, the maximum level of lead allowed in consumer paints was lowered from 0.5% to 0.06%, conforming to the maximum levels permissible under the LBP Poisoning Prevention Act.

No buildings are present on the target property. An ACM survey is not recommended.

4.15.3 *Radon*

No radon testing was conducted at the target property as part of the scope of services. A review of records regarding radon concentrations in Philadelphia County was conducted to evaluate if concentrations of radon in the general area of the target property are within the USEPA guidelines. The USEPA uses a continuous exposure level of greater than 4.0 picocuries per liter of air (pCi/L) as a guidance level at which further evaluation and potential remedial actions are recommended.

Please note that current radon information and EPA action levels are designated for residential spaces only. Commercial and industrial facilities are not subject to EPA's Action Level of 4 pCi/L as the guideline.

The environmental database and the USEPA Map of Radon Zones in Philadelphia County indicate the target property is designated as radon Zone #3. Zone #3 signifies that the average predicted radon screening level below 2 pCi/L.

Radon testing is not recommended.

4.15.4 *Lead in Drinking Water*

Lead has historically been used in pipe, solder, and brass fixtures used in water distribution systems and building plumbing systems. In 1986, the USEPA banned the use of lead at concentration exceeding 0.2% lead in solder and 8% lead in other plumbing materials. Lead in drinking water results primarily from corrosion of lead containing materials in service lines or from corrosion of lead containing materials in building plumbing such as lead solder, brass, bronze, and other lead containing alloys.

The USEPA Action Level for lead in public drinking water supplies is 0.015 ppm or 0.015 milligrams per liter (mg/L). The property is connected to public drinking water. No further evaluation is warranted.

4.15.5 *Wetlands and Flood Plains*

As defined by the USEPA and U.S. Army Corps of Engineers (USACE), freshwater wetlands are "those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions." Wetlands possess three essential characteristics including: hydrophytic vegetation, hydric soils, and wetland hydrology. All three characteristics must be prevalent to document an area as a jurisdictional wetland.

Based on the US Fish and Wildlife wetland mapper, no wetlands are indicated as being associated with the target property. No surface water features were observed which could be indicative of freshwater wetlands.

4.15.6 *Mold Evaluation*

No evidence of long-term moisture intrusion, musty odors, or visible mold growth was observed during the site visit. No further assessment is needed.

5.0 *REGULATORY AGENCY DATABASE REVIEW*

5.1 *Regulatory Agencies File Review*

BATTA submitted a Right-to-Know (RTK) request to the Pennsylvania Department of Environmental Protection (PADEP) on January 2, 2024. Previous environmental assessments are discussed in **Section 2.5.7**.

5.2 *Regulatory Program Site Mapping*

PADEP provides an Environmental Site Assessment Search Tool (the Tool) which allows consultants conducting Phase I ESAs and interested members of the public access to information maintained by PADEP concerning permitting, licensing, inspection, compliance, discharges of pollution, regulated storage tanks, site remediation, and formation (<https://gis.dep.pa.gov/esaPubSearch/>). The Tool lets users search for information stored in PADEP's eFACTS database through a program-specific query to identify conditions and/or activities regulated by PADEP in the vicinity of a particular location. Users can search for information regarding a specific target property and information about other properties of interest within a specified radius around the target property. The Tool also facilitates the identification of records maintained by PADEP that may be accessed through PADEP's informal file review process. Consultation with PADEP's Environmental Site Assessment Search Tool is a means of identifying activities of potential environmental concern. It is not a substitute for an environmental assessment conducted by a qualified professional. Within a ¼-mile radius of the target property, one (1) encroachment location, one (1) erosion and sedimentation control facility, one (1) inactive storage tank, and one (1) water pollution control facility exist. PADEP's Environmental Site Assessment Search Tool mapping results for the target property is presented in **Appendix J**.

5.3 *Environmental Database Review*

A Government Records report provided by ENVIROSITE was utilized to review environmental database reports for the target property and surround areas. The target property is identified in the ENVIROSITE Government Records Report. Surrounding sites within ¼-mile of the target property were listed in the ENVIROSITE Government Records Report as summarized in **Table 4**. The ENVIROSITE Government Records Report is presented in **Appendix K**.

Table 4: Radius Map Summary

Site Name	Address	Database Acronyms	Relative Elevation	Direction/ Distance

Notes:

AFS – Air Facility Systems
 ECHO – Enforcement and Compliance History Online
 FRS - Facility Registry Systems
 UST – Underground Storage Tank
 VCP – Voluntary Cleanup Program Sites

The target property was identified as a VCP facility. Previous environmental assessments are discussed in **Section 2.5.7**. BATA submitted a combined RIR/CP, dated December 13, 2023, to PADEP. BATA recommended the removal of the UST observed in the one (1) test pit and capping of impacted soils. Investigations are currently ongoing.

Four (4) facilities were identified as being down-gradient relative to the target property. Groundwater flow generally mimics topography from higher elevations to lower elevations. Therefore, these facilities have no impact on the target property.

Two (2) facilities were identified as being cross-gradient relative to the target property. These facilities are located southeast of the target property with inferred groundwater flow towards the east. Therefore, these facilities have no impact on the target property.

One (1) facility, Jackson Res, was identified as being up-gradient relative to the target property. This facility was identified on the eFACTS Environmental Remediation database for being an active Brownfield as of December 2023. This facility was identified in the Phase I ESA, dated May 18, 2022 (revised May 17, 2023), as an unregulated leaking underground storage tank containing fuel oil #2. This facility could be impacting the target property.

6.0 DATA GAPS

The general information and operating history of the target property were utilized and found useful. The historical documentation and area history provided good, generalized coverage of the target property and its surroundings.

7.0 CONCLUSIONS AND RECOMMENDATIONS

BATTA has performed this *Phase I ESA* in conformance with the scope and limitations of ASTM Practice E 1527-21 at the request of Yanique Joyner. The target property is located at between 777 to 787 North 38th Street; 770 to 774 North Dekalb Street; and 3716 to 3726 Brown Street. The target property is currently vacant that encompasses 0.4-acres of land.

The Phase I ESA was performed to determine the likelihood that a REC, CREC, HREC, or environmental contamination exists at the target property due to current or previous activities on, or in the immediate vicinity of the target property. No CRECs or HRECs associated with the target property were identified. The following RECs associated with the target property were identified:

- During the RI, one (1) UST was observed in one (1) of the three (3) test pits excavated at the target property in May 2023. Impacts to soil were identified during the RI and addressed in a combined RIR/CP, dated December 13, 2023, and submitted to PADEP for approval.
- A previously identified unregistered leaking tank, now in PADEP Act 2, was identified in the ENVIROSITE VEC Application and ENVIROSITE Government Records report. This facility is located directly upgradient from the target property. There could be potential impacts to the target property.

BATTA recommends continuing the process within the PADEP Act 2 program for a release of liability.

RECs were identified under the guidelines of the ASTM Practice E1527-21.

8.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

BATTA declares to the best of our professional knowledge and believe, BATTA meets the definition of Environmental Professional as defined in section 312.10 or 40CFR 312.

BATTA has the specific qualifications based on education, training, and experience to assess a property from the nature, history, and setting of the target property. BATTA has developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40CFR Part 312.

Due to the limited nature of the Phase I ESA, BATTA cannot guarantee that there are no environmental liabilities at the target property beyond what was revealed by the physical inspection, existing conditions, historical reviews, and available records at the time of the investigation.

Be advised that the data provided with this report only represents conditions that existed at the time of the investigation. If additional information becomes known, then an additional ESA may be warranted.

The data, information, interpretations, and recommendations contained in this technical report are presented solely as a basis and guide to the existing conditions at the evaluated properties expressed in this report. BATTA developed the conclusions and professional opinions presented here in accordance with ASTM E1527-21. As with all Phase I ESAs and reports, the opinions expressed here are subject to revision if new information arises in the future, and no warranties are expressed or implied.

This report has not been prepared for use by parties other than that of the client. It may not contain sufficient information for the purpose of the other parties or other uses. If any significant changes are made to target property conditions described in this report, the conclusions and recommendations contained herein may

be invalid, unless the changes are reviewed by BATTAs, and the conclusions and recommendations are modified or approved in writing.

9.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

Since 1982, BATTAs has provided environmental consulting and analytical services to public and private sector clients in the states of Delaware, New Jersey, Maryland, and Pennsylvania. The office is composed of BATTAs, which consists of the Industrial Hygiene and the Geo-Environmental Groups, and of BATTAs Laboratories, Inc. Together, these groups provide a broad base of talents and disciplines to solve complex environmental problems in a practical and economical manner.

BATTAs's staff of approximately 40 multi-disciplinary scientific professionals has routinely performed Phase I ESAs, Intrusive Soil Studies, Remedial Investigations, Feasibility Studies, etc. on behalf of clients such as Wachovia, Wilmington Trust Company, Beneficial National Bank, PNC Bank, Wilmington Savings Fund Society (WSFS), Artisans Savings Bank, real estate developers, and general contractors.

Phase I ESAs are performed under the guidelines of the ASTM E 1527-21. In addition to the ASTM Standards, BATTAs also follows the environmental assessment guidelines of the specific institution as requested.

Appendix B – Environmental Questionnaire

Please answer the questions below to the best of your knowledge. It is encouraged you complete and return the questionnaire as soon as possible.

1. When did you purchase the property?

We received site control as of April 2022. Current owner is PHDC – Land Bank

2. If not the current owner, who currently owns the property?

We received site control as of April 2022. Current owner is
PHDC – Land Bank

3. How many buildings are on the property and what year were the buildings constructed?

N/A

4. What is the current use of the property? (Please list each tenant)

Vacant land

5. What is the past use of the property?

Please review ESA reports

6. What utilities are present on the property? (Please list the name of the utility companies) None.

Water:

Electric:

Gas:

Sewer:

Heat (Oil):

7. Are there currently, or have there ever been, any underground storage tanks on the property? If so, how many? What is the size of the tanks and the contents?

A Phase I ESA, was conducted and identified the following:

During the site inspection, no evidence of USTs was observed. No further assessment is warranted.

8. Are there currently, or have there ever been, any above ground storage tanks on the property? If so, how many? What is the size of the tanks and the contents?

A Phase I ESA, was conducted and identified the following:

During the site inspection, no evidence of ASTs was observed. No further assessment is warranted.

9. Do you know of spills or other chemical releases that have taken place at or have impacted the property?

Unknown, please see ESA report

10. Do you know of specific chemicals that are present or once were present at the property?

Unknown, please see ESA report

11. Are you aware of any evidence of waste disposal on the property? If so, please explain.

ESA report states: observed no trashcans or dumpsters on the target property. No further assessment is warranted

12. Any transformers, capacitors, hydraulic equipment, or other equipment on the property that may contain or have been tested for the presence of PCBs?

No

13. Are there currently or have there been any pits, ponds, or lagoons located on the property that are associated with waste treatment or disposal? If so, please explain. No

14. Does the property discharge wastewater (other than stormwater) directly to a ditch or stream on or adjacent to the property?

ESA report states, The target property is undeveloped and does not generate wastewater

15. Are there any oil/water separators or other features designed to minimize pollution? If so, please explain. No

16. Are you aware of any environmental cleanup liens against the property, governmental notifications relating to violations of environmental law, or threatened, pending, or past lawsuits or administrative proceedings concerning a release or threatened release at the property? If so, please explain.

No

17. Are there any environmental permits for the property (for example, solid waste disposal, hazardous waste generation, wastewater permits, NPDES permits, tank permits)? If so, please explain.

No

18. Are there any controls in place at the property to control or reduce contamination or exposure to contamination? For example, land use restrictions, caps, engineered barriers? If so, please explain.

No

19. Are any preparedness/prevention plans in place? For example, spill prevention countermeasures and control plans (SPCC), etc.? If so, please explain.

Unknown

20. Do you know of any environmental cleanups or past assessments that have taken place at the property? If so, when?

Unknown

21. Do you have any other previously prepared documents for the property that may include information regarding the environmental status or past use of the property?

Batta preformed ESA

22. Based on your knowledge and experience, has any offsite investigation been found to impact the property? If so, please explain.

Unknown

Historical
Information
Gatherers

This Research Summary identifies the products and services provided by Historical Information Gatherers, Inc. (HIG) for the above referenced site location. All products are provided as PDFs unless otherwise noted.

FIM+ Maps

The HIG Historical Map Collection and the United States Library of Congress Map Collection were searched for fire insurance maps (FIMs), real estate atlases and similar maps for the site location and adjoining properties. These maps were used to create a multi-page file named FIM+Maps. The maps have title blocks that include the map publisher, year the map was created and, if applicable, the year the map was last updated. The years provided are:

1886, 1888, 1892, 1895, 1901, 1905, 1910, 1911, 1922, 1927, 1951, 1965, 1976, 1980

Disclaimer & Limitation of Liability

This Research Summary and the related documents and images provided by Historical Information Gatherers (hereafter referred to as the "Site Specific HIG Data") contain information obtained from a variety of public and private sources. Additional information for the site and surrounding properties may exist. Accordingly, there can be no guaranty or warranty that the information provided is complete for its particular intended purpose. No warranty expressed or implied, is made whatsoever in connection with the Site Specific HIG Data. Historical Information Gatherers specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular purpose. Historical Information Gatherers, its officers, employees and independent contractors cannot be held liable to anyone for any loss or damage, whether arising out of errors or omissions, negligence, accident or any other cause, resulting directly or indirectly from any information provided or any information not provided in the Site Specific HIG Data. Any liability on the part of Historical Information Gatherers is strictly limited to a refund equal to the amount paid for the Site Specific HIG Data.

HIG Copyright Notice

This Research Summary and the selection, arrangement and compilation of Site Specific HIG Data are the property of Historical Information Gatherers. © Copyright 2023 by Historical Information Gatherers, Inc. All rights reserved. The person or entity that ordered and paid for the Site Specific HIG Data is granted a personal, non-assignable, limited license to reproduce the Site Specific HIG Data solely for purposes of providing supporting documentation for reports produced for the site location which is noted on page one of this Research Summary. Any other reproduction or other use of the Site Specific HIG Data in any media or format, in whole or in part, is expressly prohibited without prior written permission from Historical Information Gatherers, and the person or entity that ordered and paid for the Site Specific HIG Data assumes all liability for the making of any such reproductions.

Licensing Agreement

The licensing agreement between Historical Information Gatherers and infoGroup provides that Historical Information Gatherers may create photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright. The licensing agreement also permits the person or entity that ordered and paid for the Site Specific HIG Data to include photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright as supporting documents for reports produced for the site which is the subject of the Site Specific HIG Data.

City Directory Report

Envirosite's Standard City Directory Report is a screening tool designed to assist in historical use determination of a subject property and adjacent properties. It includes a search of Property Archives digital datasets and national book collections including the Library of Congress and/or the Allen County Public Library at five year intervals or the closest available intervals.

RESEARCH SUMMARY:

The following research sources were consulted in the preparation of this report:

<u>SOURCE:</u>	<u>YEAR:</u>
Property Archives	2020, 2015, 2010, 2006, 2001, 1998, 1993
Philadelphia Criss Cross Directory	1988, 1983, 1978, 1973
Philadelphia Street Address Directory	1967, 1961, 1956, 1937

Property Archives is a proprietary and comprehensive dataset of over 1.5 billion commercial, industrial and residential records, business names and uses and occupant records for every city and town in the United States, from recent years to the early 1990s. Property Archives dataset is wholly owned and operated by Property Archives, LLC

This report was prepared by Property Archives, LLC for Envirosite Corporation

SUBJECT PROPERTY:

787 N 38th St , Philadelphia, PA 19104

ADJOINING PROPERTIES:

- 745 - 790 N Dekalb St, Philadelphia, PA
- 3710 - 3750 Brown St, Philadelphia, PA
- 781-801 N 38th St, Philadelphia, PA, 19104

ENVIRONMENTAL LIEN & AUL REPORT

ENVIRONMENTAL LIEN & AUL REPORT

Property Archives Environmental Lien & AUL Report documents the owner(s) of specified property from the most current publicly available date back to the date of the most recent transaction. Our researchers have over 50 years of combined experience in the environmental due diligence and title research industries. They review the local land office records and relevant state agency records for environmental liens and activity and use limitations recorded against the property back to the date of the last transaction or January 1, 1980 for the most recent transaction. A copy of the most recent deed (when available) is included as an appendix to the report. Copies of any environmental liens and/or activity and use limitations, if found, are included in the appendix of the report.

Records in the following offices were reviewed in preparation of this report:

Philadelphia Property Assessment Office

Philadelphia County Recorder of Deeds

APPENDIX A

**REDEVELOPMENT
AUTHORITY
OF THE CITY OF
PHILADELPHIA**

1500 Locust Street
Philadelphia
Pennsylvania 19102
215-686-1000

1410 Locust Street

NOTICE OF CONDEMNATION

In accordance with §404 of the Eminent Domain Code the REDEVELOPMENT AUTHORITY OF THE CITY OF PHILADELPHIA states that:

1. A Declaration of Taking was filed by the Redevelopment Authority on the 26th day of OCTOBER 2005 in the Court of Common Pleas of Philadelphia County, as of OCTOBER Term 2005, No. 2563.
2. A description of the area condemned is contained in the copy of Resolution of Condemnor, the Redevelopment Authority of the City of Philadelphia, and is attached hereto, made a part hereof, and marked Exhibit "A".
3. The names of the owners of property interests condemned are attached hereto, made a part hereof, and marked Exhibit "B".
4. A small condemnation plan showing the property condemned is attached hereto, made a part hereof, and marked Exhibit "C".

IN WITNESS WHEREOF, the REDEVELOPMENT AUTHORITY OF THE CITY OF PHILADELPHIA has caused this Notice of Condemnation to be executed by its proper officers and its seal affixed hereto and attested the 25th day of OCTOBER 2005.

ATTEST:

DAVID THOMAS
Deputy Executive Director

REDEVELOPMENT AUTHORITY OF
THE CITY OF PHILADELPHIA

RESOLUTION NO. ~~18027~~ 18,027

AUTHORIZING THE SELECTION AND APPROPRIATION OF AN AREA KNOWN AS WEST PHILADELPHIA REDEVELOPMENT AREA, MANTUA URBAN RENEWAL AREA, CONDEMNATION TWELVE PHILADELPHIA INCLUDING CERTAIN LAND IMPROVEMENTS, AND PROPERTIES, AND AUTHORIZING THE FILING OF A DECLARATION OF TAKING AND ALL NECESSARY ACTION FOR THE ACQUISITION THEREOF.

WHEREAS, The Redevelopment Authority of the City of Philadelphia pursuant to authorization contained in Ordinances of City Council of Philadelphia, adopted on December 19, 2002 and June 2, 2005 and signed by the Mayor on January 14, 2003 and on June 14, 2005 respectively, is about to proceed with the redevelopment of the area known as, WEST PHILADELPHIA REDEVELOPMENT AREA, MANTUA URBAN RENEWAL AREA, CONDEMNATION TWELVE; and

WHEREAS, In order to carry out the terms of said authorization, it is necessary that the Redevelopment Authority acquire title in fee simple to the land, improvements and properties included in that portion of the area to be redeveloped; and

WHEREAS, The Redevelopment Authority has entered into negotiations with owners of certain properties within the area boundaries and has been unable to obtain options from or effect settlement with owners of certain properties within the area boundaries needed for redevelopment as approved by City Council, because of disagreement as to price or because the owners are uncertain, unknown, absent or under some legal incapacity, or because of uncertainty of title ownership, or other causes; and

WHEREAS, In accordance with Section 9 (i) as amended and 12 of the Urban Redevelopment Law, being the Act of May 24, 1945, P. L. 991, the Redevelopment Authority is authorized to acquire title to said properties through eminent domain proceedings;

NOW THEREFORE, BE IT RESOLVED THAT, the Redevelopment Authority of the City of Philadelphia, in accordance with the authority conferred upon it by law selects and appropriates for the purpose of redevelopment:

Condemnation Parcel No. 58

ALL THAT CERTAIN lot or piece of ground situated in the 24th Ward of the City of Philadelphia and described as follows:

BEGINNING at the point of intersection of the Easterly side of 38th Street (60 feet wide) and the Southerly side of Brown Street (50 feet wide).

CONTAINING in front or breadth on the said 38th Street 20 feet and extending of that width in length or depth Eastward between parallel lines at right angles to the said 38th Street 75 feet to a point.

BEING KNOWN AS: 787 N. 38TH STREET

Exhibit A-58

RPJ
10/5/05

The foregoing descriptions contain the areas condemned.

RESOLVED: That all title and private rights or easements of whatever nature of property owners in beds of opened and/or unopened streets, located within the area, are hereby selected and appropriated for the purpose of redevelopment in accordance with law.

RESOLVED: That the title to be acquired shall be absolute or fee simple title, including all easements, rights-of-way, and real property interests of whatever nature.

RESOLVED: That Council for the Redevelopment Authority and its proper officers are hereby authorized to file a Declaration of Taking and such other proceedings, including the entry of such Bond as may be necessary or desirable, to carry out the purpose of this Resolution.

RESOLVED: That the institution of such proceedings, and any damages which may be agreed upon or awarded to any party in interest, including the owner or owners of said properties located within the area, shall be paid out of the funds of the Redevelopment Authority of the City of Philadelphia.

Source Description

Source Description : NCDB supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
The Pennsylvania Department of Environmental Protection's (DEP) eFACTS is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

FEDERAL CERCLIS LIST

CERCLIS NFRAP: The CERCLIS sites with No Further Remedial Action Planned from the CERCLIS program database. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 10/03/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 12/28/2023

Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 10/03/2023

CERCLIS-HIST: The CERCLIS program database contains information on the assessment and remediation of federal hazardous waste sites. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 10/03/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 12/28/2023

Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 10/03/2023

EPA SAA: Listing of Sites with Superfund Alternative Approach Agreements.

Agency Version Date: 07/10/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 12/29/2023

Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 10/04/2023

FEDERAL FACILITY: Sites where Federal Facilities Restoration and Reuse Office (FFRRO) arranged cleanup for Base Closure and Property Transfer at Federal Facilities

Agency Version Date: 10/03/2023
Agency Update Frequency: Varies
Planned Next Contact: 12/28/2023

Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8712
Most Recent Contact: 10/03/2023

SEMS_8R_ACTIVE SITES: The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. NPL sites include latitude and longitude information. For non-NPL sites, a brief site status is provided.

Agency Version Date: 10/03/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 12/28/2023

Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 10/03/2023

SEMS_8R_ARCHIVED SITES: The Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Agency Version Date: 10/03/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 12/28/2023

Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 10/03/2023

FEDERAL DELISTED NPL SITE LIST

DELISTED NPL: National Priority List of sites that were delisted and no longer require action

Agency Version Date: 10/03/2023

 Property Size : 2.5
 Local Parcel Number : N/R

Former Use :

The Subject Property is part of the Mantua Urban Peace Garden (MUPG), a 2.5-acre community garden and recreational space that was established in May 2013. The Subject Property is owned by the Philadelphia Redevelopment Authority (the "Owner") and is leased by the Neighborhood Gardens Trust and maintained by Mt. Vernon Manor (MVM) CVC (the "Occupants"). According to city property records, the Subject Property is zoned as residential single-family housing (RSA-5). Surrounding property use is primarily residential and recreational. The Subject Property is bounded by Brown Street to the north, North 37th Street to the east, residential homes to the south, and North Dekalb Street and a residential property to the west. The area surrounding the Subject Property consists of residential housing, open park areas, a playground with a baseball field, and Southeastern Pennsylvania Public Transportation Authority (SEPTA) Regional Railroad Tracks. The area surrounding the Subject Property was developed prior to 1895. Residential properties were developed on the Subject Property prior to 1922. Between 1940s-1970s, some of the residential properties were demolished and by 1981 the Subject Property was vacant. In October 2005, the Philadelphia Redevelopment Authority acquired the Subject Property. In 2013, the Subject Property and surrounding area was developed as a community garden and recreational space. One water main connection enters the Subject Property from North 37th Street. There are no other utilities (storm water/sanitary sewer, gas, electric, or telecommunications) connections at the Subject Property.

Source Description

Source Description : AIR contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description : NCDB supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements. The Pennsylvania Department of Environmental Protection's (DEP) eFACTS is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description : ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Source Description

Source Description :

The Pennsylvania Department of Environmental Protection's (DEP) eFACTS is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

HYDROLOGIC UNIT

Hydrologic Unit Maps

USGS

The United States Geological Survey created a hierarchical system of hydrologic units originally called regions, sub-regions, accounting units, and cataloging units. Each unit was assigned a unique Hydrologic Unit Code (HUC). As first implemented the system had 21 regions, 221 subregions, 378 accounting units, and 2,264 cataloging units. Over time the system was changed and expanded. As of 2010 there are six levels in the hierarchy, represented by hydrologic unit codes from 2 to 12 digits long, called regions, subregions, basins, subbasins, watersheds, and subwatersheds. The table below describes the system's hydrologic unit levels and their characteristics, along with example names and codes.
